SEQUOIA PROBLEMS

Why do kid use
their phone in
class?

Recently in 2025, new data has shown that:

- 80% of Sequoia's students use their phones in class.

Most of the time they claim that their phone is more important than learning.

What could they possibly be doing on their phone instead of being present in class? We asked a couple of students from each grade and here's what they said:

Anonymous 8th Grader:

I would use my phone to watch TikTok! I need to use Tiktok, I can't go a single second without it!

Anonymous 7th Grader:

Playing video games IS a necessity.

Anonymous 7th Grader: I need to text my friends about my handsome crush and how he looked in my direction!

Anonymous 6th Grader: Class is pmo to much im to cool for school id rather be on ts phone.

Teacher Interview!

I made this book! (I didn't)

Ms. Adam

Interviewer Jacob:

So Ms. Adam, what do you strive for a student to improve in?

Ms. Adam: That's a great question Jacob! Well, I am an English teacher and I strive for students to communicate effectively and easily.

Interviewer Jacob: What are you grateful for today?

Ms. Adam: Oh a lot of things! A good cup of coffee to start my day. I'm also grateful to see my students... and that it is getting less cold. There's also a new season of this T.V. show I watch, *Mo*. During the morning I watch it while running on my treadmill.

Interviewer Jacob: Wow! What a great way to do something you like and get a workout in at the same time
