Are students good enough to play in March Madness?

Scientists from other planets say that students are not capable of scoring even one point in March Madness. Adam Silver, the director of the NBA, evaluated the students and determined that they would score negative points. They also say that the best coaches and trainers in the universe would not be able to improve their stats. Some of the backlashes of playing in march madness would be damaged ego, broken ankles, a mouthful of gravel, and getting dunked on. If you are a sequioa student planning on playing in march madness please don't!!!!
