COMPUTER CATASTROPHE

IMPROPER COMPUTER USE?

Unresponsible Eugene

students may often get bored but that is no excuse to use your chrombook the way that it is not intended. chrombooks are a privillage to have and are strictly not for the use of playing games or using them for anything innapropriate. studies even show that Heavy technology use and off tasking with chrombooks has been associated with lower academic performance and reduced school connectedness

WHY?

It was a fine evening at sequoia middle school, the birds chirping the sun shining everythings going as planned for a perfect sequoia day. young Eugene marches to his next class, he walks in and sees that its a substitute. In his mind hes thinking "im going to do anything I want to, especially play games". he pulls out his chromebook and starts gaming then suddenly the chrombook magically gets legs and arms and CONSUMES the student. hes gone, but he finally learned his lesson. Out of nowhere the chrombook angel brings him back and he knows not to misuse his chromebook
